Personal details	
First name: Sample	Last name: Example
Name of previous study program 1: Psychology ; Name of previous study program 2: Educational Science	
University Name 1: University of Twente	University City and Country 1: Enschede, Netherlands
University Name 2: University of San Diego	University City and Country 2: San Diego, United States
Important information on the transformation/conversion of credits	

<u>**University of Twente:**</u>

Does your transcript of records indicate ECTS credits?

☒ yes (please use the ECTS credits in the table below; you may skip the rest of this page)

<u>**University of San Diego:**</u>

Does your transcript of records indicate ECTS credits?

☐ yes (please use the ECTS credits in the table below; you may skip the rest of this page)

☒ no (it is vital that you **fill in the rest of this page** <u>**completely and thoroughly**</u>! Otherwise we cannot convert your university's credits into ECTS and therefore not process your application. Please note that you <u>must provide proof</u> in German or English for your conversion information!)

What is the regular study duration in your program? 6 semesters OR 3 years
How many credits are necessary (minimum) to graduate from your program? 180 credits
- **How do your credits translate into ECTS credits?**
  → 1 credits from your university = 1.5 ECTS credits
- **Alternatively: How much workload is associated with one credit in your university?**
  One credit = 1.5 hours of work ☒ per week ☐ in total (usually per semester)

Do these hours of work include time for preparation, post-processing, assignments, and examinations or do they only include in-class time?* ☐ Includes "out-of-class time" ☒ Includes in-class time <u>only</u>-

Please indicate, where we can prove whether your information on the credit system/hours is correct (website or uploaded document)
https://www.utwente.nl/en/education/bachelor/study-in-twente/grading-system/ ; example for a transcript (needs upload) stating the conversion available here: Example Transcript; example for a document from the university (needs upload) stating the conversion available here: Example Doc

Prior knowledge and experience in *Learning Sciences, Statistics & Scientific Research Methods, and Academic Skills*						
Title of course/activity *Use the course title that is stated in your official transcript of records (i.e. the official translation of it).* **If the title differs from the title in your transcript, we may be unable to score it!**	**Description of course/activity** *From the description, it needs to become clear why your course/activity (with regard to the actual content it covered) can be counted as Learning Sciences, Statistics & Scientific Research Methods, or Academic Skills or as partially fulfilling the requirements of more than one domain. Please check the examples thoroughly!*	**Obtained credits*/ hours in total** *(If there are no credits available, please indicate hours; e.g. for jobs, internships with certificate)*	**Credits/ Hours** *Learning Sciences*	**Credits/ Hours** *Statistics and Scientific Research Methods*	**Credits/ Hours** *Academic Skills*	**Type of Examination** *Please state the type of examination that was required in the course/job/internship (if applicable)*
University of Twente						
Introduction to Statistics in the Social Sciences	In this course we learnt about basic statistical concepts (e.g. mean, SD, SE) and about basic statistical testing (e.g. t-test, ANOVA, Mediation and Moderation)	1.5	0	1.5	0	☒ exam ☐ presentation ☐ essay/term paper ☐ group work ☐ Sth. else: (state here)
Exploring Psychology 1	A general introduction to the theories, methods, findings and applications of modern scientific psychology. Topics covered include history, methods, the nervous system, memory, cognition, intelligence, motivation and emotion, development, health psychology, personality and psychological disorders.	1.5	1.5	0	0	☒ exam ☐ presentation ☐ essay/term paper ☐ group work ☐ Sth. else: (state here)
Empirical Research Seminar	In this module, we had to develop and conduct our own research project. The first half of the semester was concerned with literature review and developing our own research questions and hypotheses based on previous finding in the field of emotional feedback. We learned a lot	1.5	0.5	0.5	0.5	☐ exam ☒ presentation ☒ essay/term paper

* Please indicate the original credits, as they are given in your transcript of records

	about attribution theories, self-efficacy and self-concept as well as personality theories. Subsequently we developed our own study (design, materials) and collected data on it, using a computer-based feedback scenario. The obtained data was then analysed (ANOVA, Mediation) and reported in the form of a pop-science article. During the semester, we also had to present on a regular basis on our progress within the project.					☐ group work ☐ Sth. else: (state here)
Internship Module	In my internship, I worked in the HR department of an insurance company. My key responsibilities were to develop an evaluation survey, administer it throughout the company and to analyse and prepare the data for presentation. I learned a lot about theories and concepts of evaluation in the business context and employed up-to-date evaluation instruments to develop a questionnaire, which fits the needs of the company. Most of the time, however was spent on data collection and analyses. I worked there fulltime (40hrs/week) for 3 months (10 weeks)	400 hrs	100	250	50	☐ exam ☐ presentation ☐ essay/term paper ☐ group work ☒ Sth. else: not applicable/ working certificate from employer
University of San Diego						
Child Development and Teaching	This course covered the basic theories behind child development and their applicability to learning environments. Research that reviews effective teaching practice with children was investigated and discussed.	1.5	1.5			☒ exam ☐ presentation ☐ essay/term paper ☐ group work ☐ Sth. else: (state here)
Evidence Based Practice	Throughout this course, I was given the opportunity to consider aspects of research design and statistical issues regarding rehabilitation. I thereby acquired an understanding of research and knowledge about statistical concepts such as sampling, power, reliability and validity. I also learnt how to critically reflect upon the reading of scientific articles.	1.5		1	0.5	☐ exam ☐ presentation ☒ essay/term paper ☐ group work ☐ Sth. else: (state here)
