The SOAR Method for Learning and Instruction

Montag, 13. Juli 2015, 16:00 (c.t.) bis 17:30 Uhr
Leopoldstr. 13, Raum 1209

Abstract: Students commonly employ ineffective learning strategies, which produce low achievement, such as (a) taking incomplete notes, (b) failing to organize notes or doing so in an outline fashion, and studying notes in a (c) piecemeal, and (d) redundant way. Instructors can offset these ineffective strategies and help students SOAR to success by helping students Select important ideas, Organize them, Associate them, and Regulate learning. This presentation overviews the SOAR method that Dr. Kiewra developed and presents the research findings and theory that supports it.
